Team 3: User Guide for the Fortune Teller Application

When the application begins, the program will display a welcome message and main menu containing different options to the user: 1) Show Me the Rules (located in the menu bar), 2) Login, 3) Register, 4) Play as guest, and 5) Exit the Program (located in the menu bar). After the user has selected what they would like to do, the program will perform the corresponding action.

If the user selects the first menu option, “Show Me the Rules”, the fortune teller program will display the rules to guide the user on how to have their fortune read. The program will then navigate back to the main menu after the user selects the button “Close”.

If the user selects the “Login” option, the form for logging in will be displayed. This will prompt the user to enter in their username and password. If the user selects the “Registration” the form for a new user will be displayed for the user to generate a new login. If the user selects the “Play as guest” option they will automatically be redirected to the fortune menu.

After login, registration, or guest selection the user will be redirected to a fortune menu. This menu will contain a selection of categories for the user to choose their desired fortune from, including: 1) Love Fortune, 2) Career Fortune, 3) Health Fortune, 4) General Fortune, and 5) Surprise Me. With each selection the user will be shown a fortune from the corresponding category. After being presented with their fortune, the user will then be prompted to 1) Choose Another Fortune, 2) save the fortune (only if signed in), or 3) Go Back to the Main Menu.

If the user selects the “Exit the Program” option, a confirmation message is displayed confirming the user’s desire to exit. If confirmed, the user is shown a goodbye message and the program ceases to run. If declined, the user is returned to the program’s main menu to make another selection.
