| Reviewer Name: | Hoi Lam Wong, Chelsea Nieves, Valerie Rudich, Michele Cook, Constance Sturm | |
| Date of Review: | 12/12/23 | |
| Item Reviewed: | Phase 3 Source Code, .txt Files, Project Design Plan, Test Plan | |
| Criteria | | Notes |
| Does the source code match the design plan? | Yes | The source code follows the updated design plan. |
| Is the source code complete? | Yes | Yes, the GUI is complete and fully functionality as expected. User can play as guest, login or register when opening the program. User can also store fortune they received and view them once they are logged in. |
| Are the .txt files complete? | Yes | All .txt fortune documents have been updated with data and the format has been modified for easier reading (no longer parsing with ":-") |
| Any changes that may be implemented? | No | The program is completed as of now and we are not planning to implement any more major changes. However, small upgrades could always be implemented for user's ease of use, such as storing date alongside the fortune as well as the ability to display and sort user's past fortunes by category or date. Also changes to the GUI could still be implemented to make it look more modern and interactive to the user. |
| Any changes to the test plan? | Yes | Yes, the test plan will need to be modified to include the testing of storing user's past fortunes as well as displaying them. We also need to test for email validation. |
| Any changes to the design plan? | No | The GUI had an upgrade but the flow of the functionality should be similar. |
| Is the plan well organized? | Yes | The code and .txt files are still organized on what needs to be added and what needs to be changed. |
| Is the plan free of grammer and spelling errors? | Yes | The project douments are free of grammer and spelling errors. |
